

I listen to KLOVE on 90.7FM in Newport News, VA everyday. It is the only station that my family listens to. To cause KLOVE to have to broadcast on a LPFM signal would effect the signal strength here. The signal originates in VA Beach and on bad weather days is a poor signal then. The service provided by KLOVE is uplifting and refreshing when compared to the other formats that the FCC allows to be broadcast over the open air. My children can listen to KLOVE without me and I do not have to worry. My children sing along with the songs also. IF KLOVE is reduced to LPFM, then I will have to play tapes and CDs again in the car and home. I pray that you will reconsider the decision and allow KLOVE to remain the same.
